

Informatic Tools for Project Planning, Control and Development

Salnikov Vsevolod
YRNCS workshop
Lucca 2014

A real tutorial?

- No, just a few things to think about

(Semi-) personal storage

What do you use for keeping and sharing files?

- Dropbox?
- Google drive?
- E-mail
- Usb drive?
- CD?
- Floppy????? (hm, too hard to get it now)
- Whatever...

And what about a dataset? a private one...

ownCloud?

- Stored where you want
- Completely managed by you (but in a very user-friendly way)
- OPEN SOURCE
- Store - access - share
- even can be synced with dropbox and others
- common editing (even LaTeX)
- versioning and unDelete
- contacts - calendars - emails

- desktop / mobile apps

How do you interact in your group?

- projects discussion
- tasks
- notes / remarks
- efficiency

There are lot of tools to do
that efficiently

The one I like is Redmine

Defect #17944

Helper hook doesn't change object attributes

« Предыдущее | Следующее »

Добавил(а) Ilya S 4 дня назад. Обновлено 4 дня назад.

Статус:	Resolved	Начата:	
Приоритет:	Normal	Дата выполнения:	
Назначена:	-	Готовность:	<div style="width: 0%;"></div> 0%
Категория:	Plugin API	Affected version:	2.5.2
Версия:	-		
Resolution:			

Описание

```
module RedmineIssueChecklist::Hooks
  class Hooks < Redmine::Hook::ViewListener
    def helper_issues_show_detail_after_setting(context={})
      context[:value] = 'test'
    end
  end
end
```

then check **value** in issues_helper.rb and get nil or something other, but not **'test'**

История

Single task

description / ready state / versioning / reassigning /
commenting / attachments / ...

Other functions

- Notifications!!
- news
- wiki
- forum
- user roles
- public part
- ?storage?
- Gantt chart
- time tracking
- SCM integration (SVN, CVS, Git, Mercurial, Bazaar and Darcs)

Main issue

Start using and convince to use

Discussion?

if not
